Assistive Technology Foundational Concepts Course 2022 (1.2 CEU/12.0 CEC/12 hrs)

Course Description: This self-study course is designed to provide exam candidates with materials to help with preparation for the RESNA ATP Examination. The course is intended for individuals familiar with wheelchairs and seating & positioning, and therefore expands upon other areas of interest such as ECUs, Augmentative Alternative Communication (AAC), computer access, and ergonomics. The course will provide attendees with reading assignments, recorded modules and case study questions which may assist in preparing the participant to sit for the ATP exam. The course will also go over information about the exam content and question breakdown percentages, as well as critically important standardized test taking strategies. This course includes practice examination questions with explanation and discussion of the answers/methodologies for coming up with the correct answer.

Learning Objectives

At the conclusion of the course the participant will be able to:

1. Discuss exam content and knowledge areas that can to successful completion of credential exam.
2. Review and discuss 3 test taking strategies for standardized exams.
3. Use basic seating & positioning concepts to describe 2 clinical products and 2 technologies that would improve independence.
4. Using their personal pre-test performance, identify 3 areas for additional preparation for ATP exam.
